Students Get the Most from the iPad This School Year with Tips from Small Dog Electronics

SOUTH BURLINGTON, VT— Recent data released by Yahoo! indicates that Apple's iPad is gaining in popularity among the college demographic. Over the next few weeks, students across the country will be heading back to campus – many with a new iPad in tow. This year the experts from Small Dog Electronics recommend the following iPad apps to help college students get the most out of their investment.

- **Papers:** Perfect for research-oriented classes and majors, this app is the ideal solution for students who rely heavily on online databases and journals to complete assignments. The easy-to-use interface lets students import PDFs and search, download, organize and annotate

documents from any online journal to which their schools provide access. Papers is available through iTunes for \$14.99.

- **Notes Plus:** This powerful note-taking app supports handwriting, typing and audio recording and features PDF exporting, emailing and Google Docs uploading. Notes Plus is the perfect app for taking notes during class lectures or presentations, when typing can often seem rude. The app is available through the iTunes store for \$4.99.
- **iStudies Pro:** This app, available for \$2.99 through iTunes, is the all-in-one interactive student planner. The user friendly interface helps students take charge of their chaotic lives by keeping track of assignments, class schedules and professor contact information all in one place. iStudies Pro helps students prioritize their work to effectively manage their time and can even calculate students' grades in real-time as the semester progresses.
- **GoodReader:** Available for \$4.99, this app allows students to store, view and annotate almost any type of document or file. Students can utilize typewriter text boxes, sticky notes, lines, arrows and freehand drawings on top of any PDF to edit documents however they find most effective. GoodReader also offers a robust file system so users can organize documents however they choose!

“Today many college students are utilizing electronic devices like the iPad to help make the most of their education. With the right tools and applications, the iPad can free students from the burden of lugging around heavy textbooks, while also allowing them to study more effectively and to engage more actively in class. With that in mind, our team wants to be sure that students who plan to head back to campus with an iPad this year have access to the tools and support they need to get the most out of their investment,” said Don Mayer, chief executive officer and “Top Dog” of Small Dog Electronics.

Small Dog Electronics is New England’s largest Apple Specialist and Authorized Apple reseller of new and refurbished Macintosh computers,
