MINI-MIC RAPCAP

New Mini-microphone solves an iPod dilemma

09.21.2009– Burlington, VT – Think your iPod can only play music? Now, with the addition of a slick little device called the RapCap, it can do double duty as a recorder, and an exceptionally high quality recorder, at that.

Chill Pill Audio has extended their line of products to include the RapCap, a clever little microphone that makes it easy to record crisp, clear audio on compatible iPods. Its plug-and-play so it's a cinch to use. After you're done recording, connect your iPod to your computer, and it'll automatically sync with iTunes and download the new files, organizing them by date and time. The RapCap features a high sensitivity, wind resistant mic, and is only 36mm in length and 13 mm in diameter (about the size of a pen cap), so it's extremely convenient and becomes an easy travel partner with your iPod.

With the RapCap, your iPod becomes a high-performance recording device for daily messages or memos, class lectures, on the spot interviews, business meetings and seminars, or for recording music practice sessions.

The Rap Cap is available in 11 colors to match your iPod, and is available at www.smalldoglelectronics.com for \$14.99.
